

Forward Looking Statements

Certain information included in this presentation and other statements or materials published or to be published by TextainerGroup Holdings Limited ("the Company") are not historical facts but are forward-looking statements relating to such matters as anticipated financial performance, business prospects, technological developments, new and existing products, expectations for market segment and growth, and similar matters. In connection with the "safe harbor" provisions of the Private Securities Litigation ReformAct of 1995, the Company provides the following cautionary remarks regarding important factors which, among others, could cause the Company's actual results and experience to differ materially from the anticipated results or other expectations expressed in the Company's forward-looking statements. The risks and uncertainties that may affect the operations, performance, development, results of the Company's business, and the other matters referred to above include, but are not limited to: (i) changes in the business environment in which the Company operates, including global GDP changes, the level of international trade, inflation and interest rates; (ii) changes in taxes, governmental laws, and regulations; (iii) competitive product and pricing activity; and (iv) future performance of the business and overall industry.

As required by SEC rules, we have provided a reconciliation of the non-GAAP financial measures included in this presentation to the most directly comparable GAAP measures in materials on our website at www.textainer.com.

Quarterly Earnings and Business Highlights

Overview of Financial Results

	1Q23 and % change from 4Q22
Lease rental income	\$195M (-4%)
Income from operations	\$100M (-10%)
Adjusted Net income ¹	\$54M (-13%)
Adjusted EPS ¹	\$1.22 (-11%)
Adjusted EBITDA	\$167M (-7%)
Annualized ROE	13% (-11%)

Highlights

- Utilization remains elevated and fleet cash generation stable, considering two fewer billing days in the quarter, during this traditionally slower part of the year.
- 1Q23 average and current utilization rate at 98.8%.
- Stable future cash flows and profitability from our long-term fixed-rate leases and fixed-rate debt. The average remaining tenor for both our lease portfolio and our fixed-rate debt is 6.0 years and 5.8 years, respectively.
- Container demand remained muted, but prices are slightly above historical levels and turn-ins mostly focused on sales-age containers.
- In light of limited container investments, continued focus on shareholder returns and de-leveraging.
- Declared a common dividend of \$0.30 per common share, payable June 15, 2023.
- Repurchased 1.3 million shares of common stock at an average price of \$32.82 per share during 1Q23.

t e X

¹⁾ Combined total of Gain on sale of owned fleet containers, net, and Trading container margin.

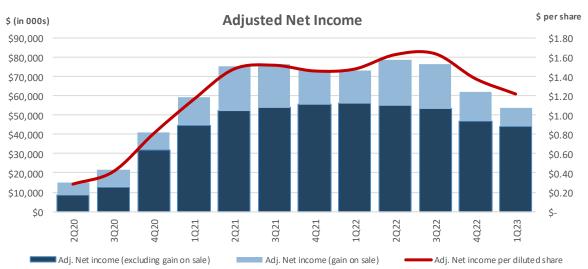

²⁾ Combined total of Containers, net, Net investment in finance leases, and Container leaseback financing receivable.

³⁾ Combined total of Trading containers and Containers held for sale.

⁴⁾ Based on date added to the fleet (delivery date). Consists of all container purchases for both the owned and managed fleet. Does not reflect moves between owned and managed.

Revenue and Profit Trends

- Long-term lease contracts and optimized resale activity provide stable cash flows and supports our long-term profitability.
- 98% of leases under fixed-rate term contracts and 91% of our debt is fixedrate or hedged, with remaining average tenors of approximately 6 years.
- Despite rising market interest rates, interest expense decreased in 1Q23 due to our hedging strategy and opportunistic debt reduction.
- In addition to de-leveraging, we continue to focus on returning capital to shareholders. During 1Q23 and over the last four quarters, common dividends and buybacks represent 102% and 85% of adjusted net income, respectively.
- Repurchased 30% of our outstanding common shares since the program commenced in 3Q19. At the end of 1Q23, the remaining available authorization was \$81 million.

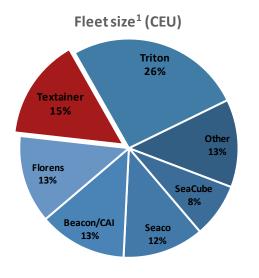

Total operating and finance lease rental proceeds, including the principal portion of finance leases. While this includes the principal portion, for financial statement presentation only the interest portion of finance leases is shown as revenue.

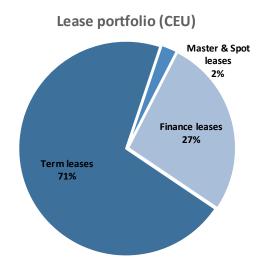

⁾ Total proceeds from container sales plus net trading margin. While this includes total resale proceeds, for financial statement presentation only the gain on sale is shown as revenue.

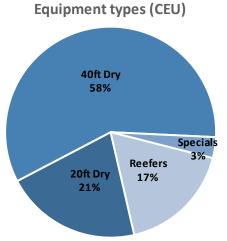

Total GAAP revenue per the income statement: lease rental income (excluding finance lease principal) + management fees + gain on sale + trading margin.

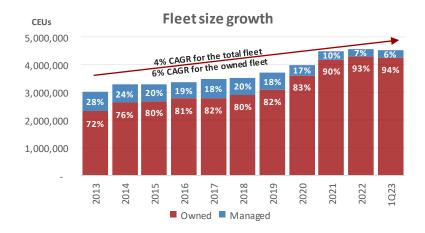

Textainer Fleet Overview

Textainer is the second largest lessor in the world

Our fleet generates stable cash-flow from a lease portfolio with 98% under fixed-rate term and finance lease contracts

Average remaining tenor of the entire lease portfolio of 6.0 years²

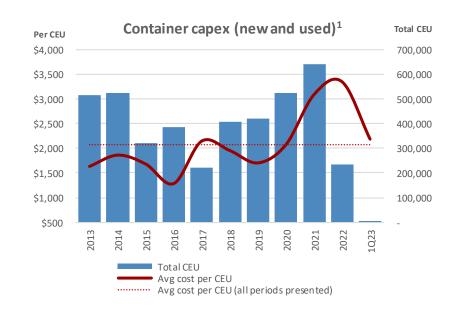

Young fleet with an average age of 5.1 years²

¹⁾ As of 4Q 2022. Peer fleet size data sourced from Harrison Consulting.

c) Calculated on an NBV basis. Includes all leases (long-term, finance, short-term, expired).

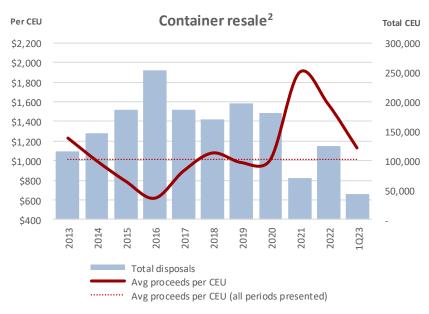

Textainer Capex and Resale

- The average cost of our fleet remains below current market prices.
- Resale volumes remain elevated since 2H 2022, after several quarters of low activity.
- Resale prices decreased during 2H 2022 given higher volumes, but have since stabilized at still attractive levels well above GAAP residual values.

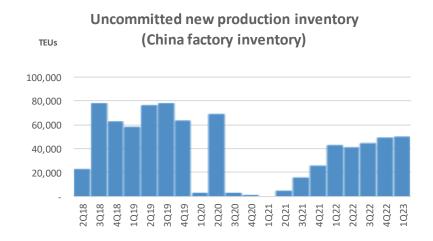

- Limited capex opportunities through the first half of 2023 as the market absorbs the existing inventory.
- Textainer maintains a disciplined approach, investing only when target returns are achieved with long term cash flows. Short manufacturing lead times allow us to invest on the basis of mostly confirmed lease opportunities.

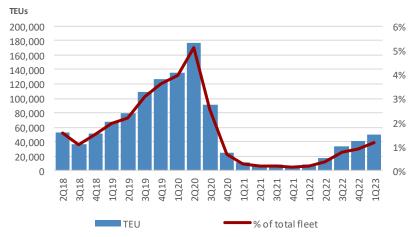

Total container purchases for both the owned and managed fleet, based on date added to the fleet (delivery date). Does not reflect fleet ownership changes between owned and managed.

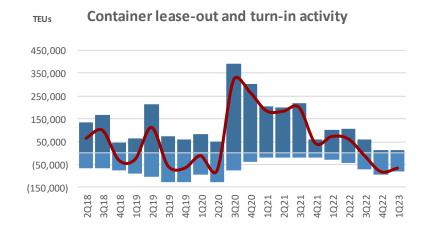

Resale of off-hired operating containers (i.e. held for sale depot containers). Does not include container trading activity (i.e. sale of new or old containers acquired exclusively for immediate resale). The average proceeds per CEU reflect total proceeds received.

Textainer Container Inventory

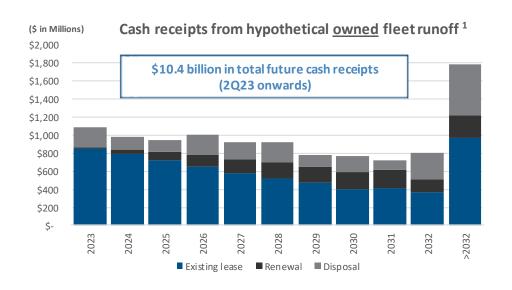

On-hire Off-hire

Turn-ins during recent quarters are mostly sales-age containers. Focused on the resale of older units and renewing maturing leases for mid-life units.

We continue to maintain strategically balanced levels of new production and depot inventory to meet demand while minimizing carrying cost.

Textainer Long-Term Lease Commitments

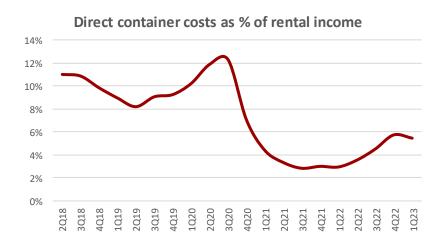

- The above shows cash receipts from the hypothetical runoff of our <u>owned</u> fleet (assuming no capex), summarized under 3 components:
 - "Existing lease" expected fixed-rate rentals during the remaining minimum contractual term of currently existing leases, plus a 1-yr build down period. Includes actual year-to-date revenue for the current year.
 - "Renewal" assumes rentals, following the expiration of the minimum contractual term of existing leases, until the disposal of the container.
 Assumes the same rental rate as of the expired lease.
 - "Dis posal" a ssumes proceeds from the disposal of containers (includes a ctual year-to-date proceeds for the current year). Disposals are assumed to occur once the lease expires and the containers reach the end of their GAAP useful life (i.e. 13 years for a 20' dry), plus a 1-year build down period. Disposal proceeds are assumed to equal current GAAP residuals (i.e. \$1,000 for a 20' dry), even though the current a verage resale prices are higher.

- Our fleet has an average age of 5.1 years and an average remaining lease tenor of 6.0 years. The period of contractually guaranteed fixedrate rentals represents 77% of the fleet's remaining depreciable life on a NBV basis.
- Controlled levels of annual lease maturities guarantee stable cash flows.
- Current resale prices are above our GAAP residual values, providing an opportunity for gains of sales age containers.
- Customers generally have on a verage a 12-month build-down period to return containers upon lease expiry.

¹⁾ Represents cash inflows from the hypothetical runoff of our owned fleet (excludes managed), assuming consistent rental rates and GAAP residuals upon disposal. This chart is for illustration purposes only and the actual runoff could differ materially due to the uncertainty of future events or circumstances, including but not limited to utilization rates, rental renewal rates or disposal prices.

Textainer Cost Management

SG&A as % of total revenues², inclusive of finance lease principal and net of distributions to 3rd party owners

Average effective interest rate per quarter1

Average fleet utilization

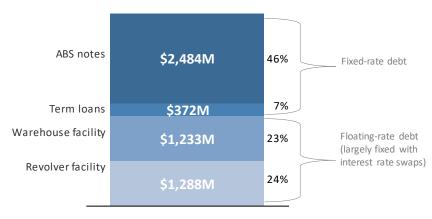

Represents the average rate for the quarter, inclusive realized hedging costs and the non-cash amortization of debt issue fees.

Total revenues consist of lease rental income, gain on sale, trading container margin, and management fee income. The denominator is net of distributions to 3rd party owners and also includes rentals for the principal portion of our finance leases which is excluded from lease rental income.

Textainer Capitalization

Outstanding borrowings by source

\$5,377M

- Debt sourced from well diversified sources.
- Our warehouse and revolver facilities have a total commitment capacity of \$3.4 billion with a syndicate of 17 domestic and foreign banks.
- Our ABS notes and Term loans are supported by a wide group of investors including life insurance companies, asset managers and banks.

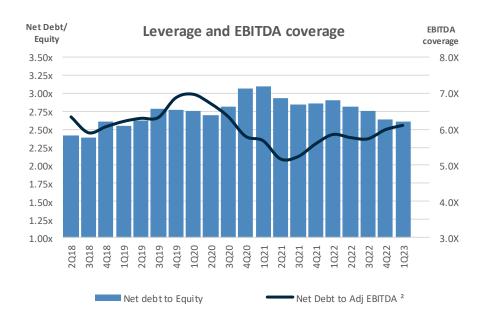

Shareholders' equity

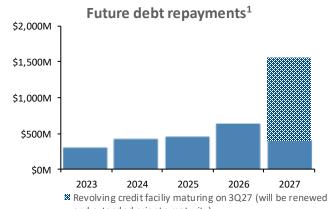

Class	Ticker	Details
Common shares	TGH (NYSE); TXT (JSE) ¹	42M shares outstanding at 1Q23
Preferred shares	TGH.PRA (NYSE) TGH.PRB (NYSE)	\$150M, 7.00% cumulative redeemable perpetual shares (Series A) \$150M, 6.25% cumulative redeemable perpetual shares (Series B)

- Common shareholders consist of a diversified group of investors. As of the last reporting date, the top 30 investors held more than half of the common shares outstanding.
- Common dividend and active share repurchase programs to return capital to our common shareholders.

Textainer Stable Debt Financing

Floating vs. Fixed rate debt	% of total at period end	Avg. remaining tenor		Spot rate at quarter end
Fixed-rate debt	53%	6.5 years	2.34%	2.34%
Hedged floating-rate debt	38%	4.8 years	2.94%	2.94%
Total fixed-rate and hedged debt	91%	5.8 years	2.59%	2.59%
Unhedged floating rate debt	9%		6.12%	6.37%
Total debt	100%		2.90%	2.94%
Amortization of debt issue fees and misc.			0.22%	0.22%
Effective interest rate (all-in)			3.12%	3.16%

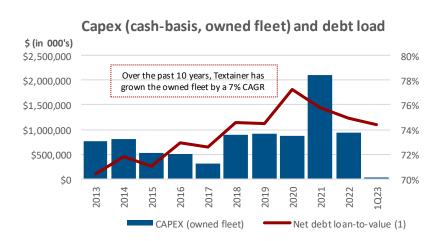

- and extended prior to maturity)
- Focused on matching our fixed-rate rental revenue to fixed-rate financing, both in amount and duration, to limit volatility and lock-in long-term profitability:
 - Our fixed-rate debt represents 91% of total debt, closely matching the 98% of our fleet under fixedrate term and finance lease contracts.
 - The average remaining tenor of our fixed-rate debt is 5.8 years, with staggered maturities, is generally in line with the 6.0 years average remaining lease term of our entire lease portfolio.
- Continued de-leveraging during recent quarters of limited capex.

Reflects contractual amortization of our notes, estimated repayments to maintain the maximum loan-to-value in our revolving facilities (based on the current existing fleet absent any future capex), and the contractual maturity of our existing revolving facilities (assuming no refinance/renewal).

Textainer Capital Allocation

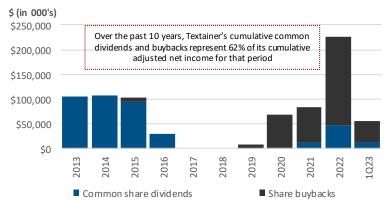

The fixed and long-term nature of both our leases portfolio and debt service generates a stable level of excess cash, providing flexibility for all three of our capital allocation priorities:

- Capex: We invest in containers when the expected returns are a ccretive to the business. The short-lead time of container manufacturing allows us to moderate capex based on demand, participating only in profitable and attractive opportunities.
- Leverage: We manage debt levels to ensure we maintain stable and optimized access to financing and sufficient available capacity for incremental capex opportunities.
- 3) Shareholder returns: We are committed to returning capital to our common shareholders, by a combination of both our quarterly common dividend and share buyback programs.

Net cash generated for capital allocation (\$ in 000s)	LTM	1Q23 annualized
Adjusted EBITDA (see reconciliation in Appendix)	\$730,182	\$667,940
Plus: Principal portion of finance leases ³	+181,222	+184,088
Plus: NBV of container disposals	+140,828	+129,440
Minus: Interest expense (excluding non-cash amortization) and preferred dividends	-173,780	-178,608
Minus: Current debt balance as of quarter end	-394,186	-394,186
Net cash available for capital allocation, net of debt service	\$484,266	\$408,674
Capital allocation alternatives (potential uses of net cash; the illust	trative amounts	
shown below for each alternative are mutually exclusive):		
1) Capex potential using current leverage Growth Replacement ^{2,3} Total capex potential using current leverage	\$1,807,107 \$614,223 \$2,421,330	\$1,442,490 \$600,880 \$2,043,370
Capex potential using current leverage Growth Replacement ^{2,3}	\$1,807,107 <u>\$614,223</u>	\$600,880

Shareholder cash returns

¹⁾ Net debt loan-to-value is calculated as borrowings (net of cash) + manufacturer Payables, divided by the NBV of our owned fleet.

²⁾ Replacement capex consists of depreciation expense, principal portion of finance lease billings, and NBV of container disposals.

³⁾ Excludes non-recurring one-time principal payments.

Current Market Environment and Outlook

t e X

Slow lease-out market

- Following two years of elevated demand and significant fleet expansion, we are now experiencing a healthy consolidation phase with limited new container production.
- In spite of muted demand for new leaseouts, turn-ins remain controlled and focused on sales-age.

Decreased container production

- Given low demand, container production has significantly decreased, with most container factories expected to remain closed through 2Q23.
- New container prices have stabilized slightly above historical averages, driven by increased component costs and scarce production.
- Resale prices have decreased from their early 2022 peak, but have stabilized since last quarter and above long-term averages and GAAP residuals.

Strong customer balance sheets

- Shipping lines are reporting normalized financial results in 2023 due to decreased freight demand but are expected to still generate positive results for the year due to their focus on contracted business with longer term durations.
- Profitability has translated into strong payment performance and has allowed carriers to shore up their balance sheets.

Low container demand expected for 2023, though we may see positive momentum in the traditional summer peak season. Utilization is expected to remain elevated through 2023.

Textainer's base revenues and profitability is supported by the fixed long-term nature of our lease contracts and use of fixed-rate hedged financing.

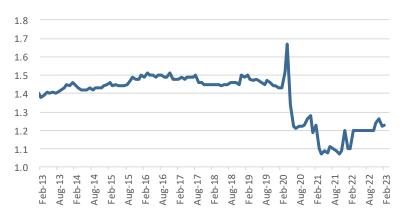

Reduced credit risk of our customers should continue into future years, as shipping lines maintain optimized balance sheets with a focus on contracted revenue.

Trade and Shipping Line Performance

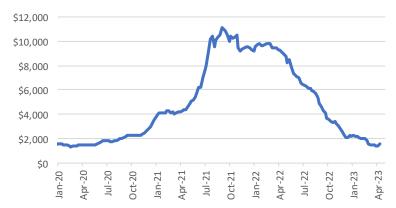

- Normalization in the greater shipping sector continues as shipping lines observe both decreased cargo volumes and spot ocean freight rates.
- Shipping lines however continue to generate profits, and their performance in recent years has allowed them to significantly optimize their balance sheets, resulting in stable financial security for the near term.
- Blank sailings have been a continuous practice by the shipping lines to better manage capacity in correspondence with shipping cargo demand.

Container throughput index¹ Seasonally adjusted (2015 = 100) 135 125 115 105 85 75 4ug-15 Aug-16 Aug-17 Feb-18 4ug-18 Feb-19 4ug-19 Feb-17

US retail inventory-to-sales ratio²

The RWI/ISL container throughput index reflects the amount of container cargo handled by a selection of 94 international ports, representing 64% of global container traffic.

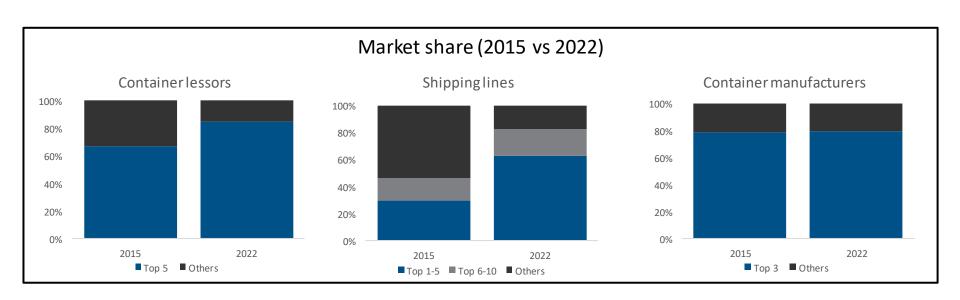

²⁾ The inventories-to-sales ratio from the US Census Bureau serves as an indications of the number of months of inventory that areon hand in relation to the sales for a month.

³⁾ The Freight Baltic Container Index (FBX) reflects the container spot rates on 12 trade lanes, covering 80% of global container trade.

Competitive Landscape

Container lessors, shipping lines, and container manufacturers have experienced a recent wave of consolidation and organic growth, with enhanced economies of scale, greatly improving the competitive landscape and facilitating a greater level of stability over economic cycles:

- Lessors: The top 5 container lessors account for 85% of the market. We expect lessors to continue rationalizing new container investments and further improve lease quality in pursuit of stable long-term returns with reduced volatility.
- Shipping lines: Consolidation and alliances have dramatically improved credit quality since the 2016 Hanjin bankruptcy. The top 10 shipping lines now account for 85% of market share, facilitating improved discipline and capacity management. This has contributed to higher freight rates and improved financial performance.
- Manufacturers: Improved economies of scale and coordination by suppliers have resulted in greater production discipline. Since early 2020, industry efforts to rationalize production levels with demand have provided support for container prices and a more balanced supply of containers which we expect will continue into the foreseeable future.

Conclusion

- Q1 2023 delivered stable performance, highlighting the resiliency of our lease rental income in this traditionally slower part of the year.
- Capex deployment has remained minimal following two years of surging container demand, but we are optimistic that the market environment will start showing positive momentum as we approach traditional summer peak season.
- Our utilization remains strong at 98.8% and is expected to remain elevated for the coming quarters. In light of current limited capex opportunities, we remain focused on optimizing capital allocation and operational efficiency, with a particular focus on lease renewals and disposal of older sales age containers.
- Fixed-rate and hedged debt represents 91% of total debt with an average tenor of 5.8 years. We continued to opportunistically pay down the unhedged portion of our debt.
- Declared a \$0.30 per common share dividend, payable on June 15, 2023. Declared a dividend on both 7.00% Series A and 6.25% Series B preferred shares, payable on June 15, 2023.
- Repurchased common shares totaling 1.3 million shares, or over \$41 million during 1Q23. Since commencing our share repurchase program in September of 2019, we have repurchased 16.9 million shares in total. At the end of 1Q23, the remaining authority under the repurchase program stood at \$81 million.
- Capital returns to shareholders by way of common dividends and buybacks in the guarter amounted to 102% of adjusted net income.

Company Overview

Company Background

- Textainer has operated since 1979 and is one of the world's largest lessors of intermodal containers with a container fleet of 4.4 million TEU (4.5 million CEU).
- Textainer leases containers to approximately 200 customers, including all of the world's leading international shipping lines.
- Textainer manages a diversified container fleet that consists of standard dry freight, dry freight specials, tanks, and refrigerated intermodal containers, mirroring the composition of the worldwide fleet.

Overview

- Headquartered in Bermuda
- Scalable network of 14 offices and around 400 depots
- Workforce of approximately 160 employees
- Publicly traded on both the New York (Ticker "TGH") and Johannesburg (Ticker "TXT") stock exchanges

Summary performance

- Last twelve-month ("LTM") lease rental income of \$806 million
- LTM Adjusted Net Income¹ of \$271 million
- LTM Adjusted EBITDA¹, inclusive of finance lease principal billings, of \$963 million
- Average fleet age of 5.1 years (NBV weighted)

Textainer Advantages

Fleet Size

- Our large fleet size is a competitive advantage, particularly in light of recent supplier and customer consolidation.
- Our size is optimal, providing benefits of scale, while retaining management agility and allowing us to focus on the most profitable deals whilst still growing our market share.
- A large fleet size affords us meaningful economies of scale with one of the industry's lowest cost structures.
- Our size allows us to hold sufficient idle inventory around the world to immediately meet any urgent demand requirements from our customers.

Capital Structure

- Track record of capital markets access with deep institutional and retail following.
- We maintain low-cost debt financing (amongst the lowest in the industry) from diversified funding sources.
- Staggered debt maturity schedule is tailored to complement lease portfolio maturities.
- Most of our debt is fixed-rate, helping mitigate interest rate risk.
- Bermuda incorporation with efficient tax structure.

Diversified Revenue

- Equipment type diversification provides exposure to industries with decoupled economic cycles.
- Our dedicated international resale team is a leader in the field as one of the largest sellers of containers in the world, focused on maximizing resale proceeds.
- We also purchase and resell containers from shipping lines, container traders and other sellers.
- We manage containers on behalf of third-party owners, earning a steady stream of low-risk fee income using our existing platform.

Infrastructure

- Experienced management team and dedicated employees providing best-in-class service to our shipping line and resale customers.
- Over 40 years of know-how to procure, inspect, market, repair and resell containers, maximizing returns over the container's entire economic life-cycle.
- Highly scalable IT infrastructure.
- Expansive global footprint to service customers in all demand locations.

Company Footprint

Textainer operates through a network of 14 offices and 400 depots covering all time zones and major trading centers over the world. Our four regional offices form the backbone of our worldwide leasing, resale, and operations activities.

Container Life Cycle Management

Initial Lease

- Lease terms of five to seven years (long-term average).
- We place a significant focus on the off-hire provisions.

45% - 75% of total expected returns

Mid-Life

- Lease renewal or re-lease to different customers.
- May be re-leased several times over useful life.
- We leverage our global infrastructure and operational expertise.

0% - 30% of total expected returns

Disposition

- Sale generally for static storage or one-way cargo.
- Resale market enjoys a different customer base.
- Container residual values generally ~50% of current asset cost.

25% of total expected returns

With over 40 years of experience, Textainer maximizes returns throughout the entire container life cycle.

Management Team

Olivier Ghesquiere President & Chief Executive Officer

31 years of international asset management experience, including work at Ermewa Group as Chief Operating Officer and CEO, Eurotainer as Managing Director and Chairman, and Brambles Group under various management positions.

Sustainability & Commitment

Approach

- At Textainer, being a responsible corporate citizen means thinking and acting sustainability for our employees, customers, shareholders and local communities.
- We take pride in the quality of our container fleet and operations, and in our contributions to the continued growth of the industry.
- Please find our 2022 ESG Summary available <u>HERE</u>.

Employees

- AIM: to maintain a work environment that is inclusive, growth oriented and fast paced
- Promote work-life balance and overall employee wellbeing
- Gender diversity:
 - 50% women in the workforce
 - 30% women on the board of directors

Customers

- AIM: to be the most reliable and responsive operator
- Work with suppliers to use waterborne paints to reduce VOC emissions, utilize bamboo-sourced flooring, and install energy-efficient refrigeration machinery in our containers
- Provide the highest quality equipment in the right location with competitive all-in costs

Environment

- AIM: to minimize and manage our impact on the environment
- Majority of operational emissions from Scope 2, electrical energy
- 17% sourced from green and renewable energy
- Purchase Lease Resell

Communities

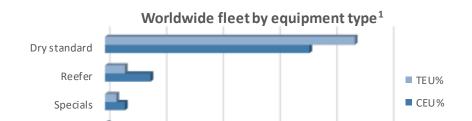

- AIM: to support local, disadvantaged communities through funding initiatives that uplift, educate and empower
- Support Zululand
 Conservation Trust to
 protect local wildlife and the communities close to them
- Provide in-kind assistance for disaster relief efforts in connection with shipping line partners

Industry Overview

Container Types

Containers are large steel boxes built to International Standardization Organization ("ISO") norms and used for intermodal freight transportation. They are divided into four main categories:

40%

60%

80%

Dry standard

Fitted with steel roof, end and side panels, wooden floors and steel doors.

Used to carry a wide range of semi-finished and finished manufactured goods, raw materials and agricultural produce.

20%

Tanks

0%

Refrigerated ("Reefer")

Steel cladding fitted with insulation and an externally mounted temperature-control unit to control internal temperature.

Used to carry frozen and temperaturesensitive goods such as meat, fish, fruit and vegetables.

100%

Specials

Similar to dry standard, but designed specifically for the transportation of non-conforming cargoes.

Used to carry non-standard items such as sheet glass, large machinery, and vehicles.

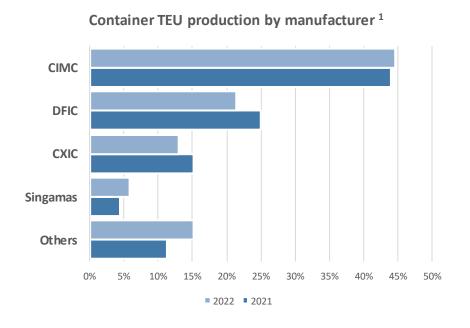

Tanks

Stainless steel cylinderset within an ISO steel frame.

Used mostly to carry industrial chemicals in liquid form and potable liquids such as fruit juices and wines.

Container Production

- Containers are manufactured in China, a highly desirable on-hire location for our customers.
- CIMC, DFIC, and CXIC have emerged as the dominant suppliers, controlling 85% of the market.
- Lead times typically range 1 to 2 months, allowing near "just-in-time" ordering, quickly adjusting to changes in market demand and reducing inventory risk.
- Leased containers have a long economic life of 15+ years and little technological obsolescence.
- At the end of their economic life, containers are sold on a secondary market to a different customer base for other uses such as static storage or one-way cargo moves.

Container Leasing

Leasing customers are primarily shipping lines which generally lease a large portion of their container fleet

Given recent consolidation, the top 10 shipping lines represent ~85% market share

Benefits Flexibility to on-hire / offto hire¹ containers to optimize lessees capacity to meet fluctuating demand requirements. Flexibility to on-hire / offhire¹ containers at locations around the globe to alleviate trade imbalances. Conserves capital for significant cash requirements such as vessels, terminals, and fuel costs. Provides an alternate source of financing in a capital

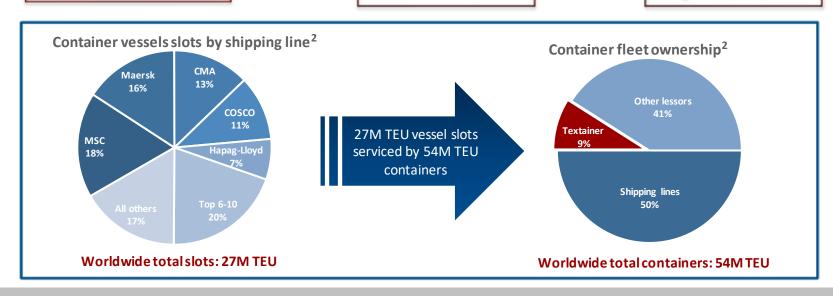

Benefits to lessors

Leases are non-cancellable, with terms typically ranging 5-13yrs (initial lease) and 1-8yrs (renewals).

Long-term nature of leases offers stable and predictable cash flows with protection during economic down cycles.

Leases are "triple-net" requiring the lessee to pay for all repairs in excess of normal wear and tear.

Lessees are incentivized to renew expiring leases to avoid repair costs and the logistical cost of the return.

intensive business.

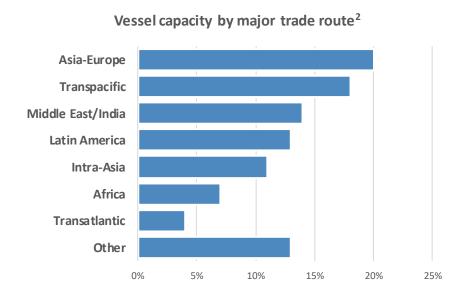

¹⁾ Containers can only be off-hired at the termination of the contractual lease term and are subject to provisions that limit the amount and location of returning containers.

World Container Trade

Container demand is inherently tied to trade.

Growth of the global container fleet is therefore expected to be in line with global GDP growth.

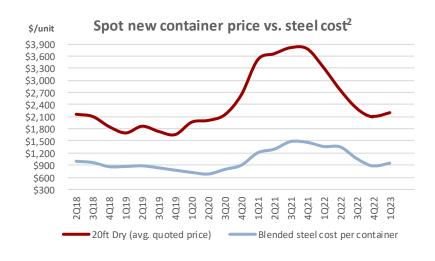

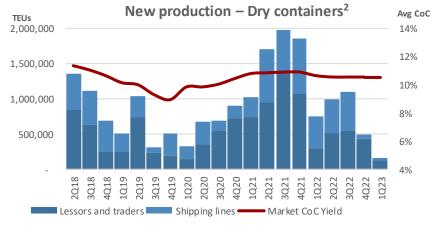

⁾ Source: GDP figures published by the IMF. Container trade figures are based on figures published by WTO and management estimates from various industry sources; total volume in TEU.

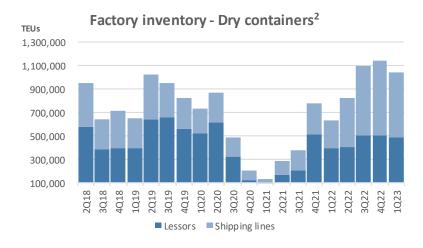

²⁾ Source: Linerlytica, based on deployed vessel capacity in TEU.
